

*The body shell of the golf club head and internal wings, in the Claim 1, are made with the beta titanium.*

has been modified to:

*The golf club head from Claim 1; whereas the internal wings are oval and moonlike shaped.*

Claim 5, on record, reads as following:

*The body shell of the club head and the internal wings, in the Claim 1, are connected in rigid form by electrical welding.*

Claim 5 has been cited as being unpatentable by the examiner. The applicant has removed Claim 5 from the current application.
